

## Welcome to study in the EMJMD programme on the Engineering of Data-intensive Intelligent Software Systems!

### Who are we?

We are **EDISS**, the Erasmus Mundus Joint Master's Degree programme bridging the gap between data science and software engineering. We educate experts with an up-to-date skillset to enter the highly demanded job market.

We offer a two-year **international master's programme** organized by **four European universities** in Finland, Spain, Sweden and Italy. The first-year studies take place at Åbo Akademi University (Finland) where you will gain core competences and strong theoretical skills that help you to succeed in your second-year specialization studies in your field of interest. During your second-year, you will be able to study either Computer Vision and Intelligent Systems at the University of the Balearic Islands (Spain), Industrial Machine Learning - Software Engineering at Mälardalen University (Sweden) or Model Driven Machine Learning - Software Engineering at University of L'Aquila (Italy).

Not only will your studies be filled with eye-opening courses, but you will also do an **internship** at an associate company and gain competences that can be highlighted in your CV. You will twice participate in an intensive one-week **Winter School** organized at a picturesque location filled with networking opportunities and fun social activities. After completing the EDISS programme, you will not only receive a **double degree** but also graduate with the ability to work in a **multicultural environment**, which is of utmost importance today.

### Why join us?

You shouldn't have to worry about financial matters during your studies as **full Erasmus Mundus scholarships are available** for the EDISS programme! The scholarship, which South/Central American students can apply for, covers the participation, travel, subsistence and possible installation costs of the two-year programme **up to a maximum of 47 000 € or 49 000 €**.

Co-funded by the  
Erasmus+ Programme  
of the European Union

## Application requirements

- A Bachelor's or equivalent undergraduate degree (at least 180 ECTS) from an accredited university in computer science, software engineering, or equivalent subject
- Good command of English language (see more on the EDISS website)

**Already interested?** Don't forget the other benefits that also await you:

- EDISS offers you the possibility to **study at two renowned European universities** and in different picturesque locations
- You will gain both practical and theoretical knowledge that make you **stand out from your peers** and help you to enter the highly demanded job market
- Relevant job market skills that will **enhance your CV** and that you will gain during an **internship** at an associate company
- **Networking opportunities with international experts** that you will meet during an intensive **Winter School** filled with fun social activities
- **Renowned educational methods**, a flat hierarchy, and a dedicated team to support you
- At the end of your studies, you will receive **a double diploma**, unforgettable experiences and **valuable connections** for the future!
